

# BACKUP & RESTORE SIMULATION & CONFIGURATION MODULE (CFG-TC04)

## About This Course

Server management is one of the most basic requirements in maintaining a healthy server/cluster, however, is often overlooked until something goes wrong. Therefore, it is essential that all IT personnel who are responsible of their servers understand the importance of server housekeeping and its impact if it is not done. This course is intended for those of you who are interested in advancing their troubleshooting monitoring and managing their servers.

Century Financial Troubleshooting training is mainly as a guideline for IT staff to do first level support of Century Financial system. The training will show you how to troubleshoot of any reported problem and find as much as information to be given to Censof for solution purposes.
