## What is e-Claims?

e-Claim is a web-based claims management system where an employee can manage claims / advance and submit claims online. This solution is fully configurable and is specifically targeted at organisations that wish to have their own online claim and advance application equipped with automatic verification and the related workflow and processes.

It covers comprehensive details of online advance & claim, thus eliminates hassles of traditional advance & claim process, saves time and offers better competition with paperless working environment.

## Why use e-Claims?

- e-Claim system is best suited for government agencies for its uniform functionality. This is because the system is developed in compliance with the policies, regulations, terms and rates set out in the circular used by all government agencies.
- Parameterization & modular enables quick configuration
- The e-Claims system is also a foolproof system because every phase of the application will be automatically rejected if it does not meet the requirements / conditions. Based on this capability, it has reduced the waste of human resources and made it more intelligent and efficient.

## Who is it for?

- Government Sector
- Private Sector
- Auctioners

## How e-Claims benefits you?

The e-Claims system is developed on a web based basis and is applied online real time (Real Time Online) for all validation process. The development of this system uses the 'Open Source Platform' which is in line with the development of ICT by MAMPU. The use of this 'Open Source Platform' can save on development costs in terms of licensing of database ownership. The system is also flexible for enhancement work.
